DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 allowed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 18-22 rejected under 35 U.S.C. 103(a) as being unpatentable over Marieb et al. (US 2002/0076925) in view of Carlson et al. (3,632,438).

Regarding Claims 18-22, Marieb et al. disclose copper alloys for interconnections having improved electromigration characteristics and methods of making same where formation of copper alloy interconnect lines on integrated circuits includes introducing dopant elements into a copper layer. Copper alloy interconnect lines may be formed by providing a doping layer over a copper layer, driving dopant material into the copper layer with a high temperature step and polishing the copper layer to form individual lines. Marieb et al. fail to disclose the required divalent ion doping of the barrier layer. However, in Claim 7, Carlson et al. disclose the required divalent ion doping of the barrier layer.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required barrier layer doped with the divalent ions in Marieb

et al. as taught by Carlson et al. in order to have a copper interconnect structure with higher reliability.
